Subject: Opportunity for input: updated PRGs, Rhone-Poulenc, LDW

Greetings. I know it's been a while since you've heard from me about the former Rhone-Poulenc facility on the LDW. EPA has once again been updating the Preliminary Remediation Goals (PRGs) which were originally completed in 2014. Some of you might recall that we started this update a few years ago then put it on hold. Because of numerous updates to various criteria and toxicity values, I felt it was prudent to make sure these PRGs are current before moving forward. These PRGs will be used to refine the contaminants of concern for the upcoming Corrective Measures Study.

I'm writing to ask if you are interested in providing input to the PRGs. Please see this as an opportunity if you have the time and interest. There will be additional milestones coming up for which you and others will have an opportunity to give input on the direction of cleanup, in particular the Corrective Measures Study report and the Statement of Basis. I expect the draft updated PRGs package to be ready in mid-June, and I would ask for your comments within a 30 day timeframe. Please **let me know by June 12 if you are interested** in receiving the package and I will send it when it's ready.

Take care,
Janette
